

Report by (name): Abdulrahim Unver, Kalle Mossberg KEX project number: N2

## Layout-checklist for bachelor thesis reports

Anita Kullen, 2026-02-05

Download the updated Latex stylefile from Canvas/files/rapportmallar och latexlab. Keep the character style and size that pops up automatically when using latex to create the pdf file.

### Length and size of report:

- 5-20 pages (recommended: around 10 pages)
- **< 5 Mbyte** (i.e. reduce size of included figures such that the size of the file does not exceed 5 Mbyte)

### Headers/Footer:

- No page numbering (this will be added afterwards when all reports are collected in the KEXbook)
- Headers must contain **project number** followed by **abbreviation of title in capital letters**  
E.g.: **A3. SOLAR CELLS AT MOONBASE**

### Report title:

- Report written in English: All words with 4 or more characters in title: 1<sup>st</sup> letter = capital letter
- Report written in Swedish: Only first letter of first word in title has a capital letter
- Adapt the original title to your project work, i.e. change of title encouraged
- If two groups work on the same project topic, the report titles must be different!

### Authors:

- Author: Firstname1 Surname1 and Firstname2 Surname2 : e.g. **Anita Kullen and Anna D. Herland** (do not include any other author information neither in the author line nor in the bottom left column)

### Check if you have kept the correct order of Swedish and English abstract, index terms etc:

- **Abstract**
- **Sammanfattning**
- **Index terms**
- **Supervisors**
- **Tritanummer**

### Abstract:

- Abstract length approximately ¼-1/3 column
- Content - check if abstract contains:  
1) aim of project, 2) method and 3) result and/or conclusions

### Sammanfattning:

- = translation of abstract into Swedish, write it in the same format as the English abstract

### Index terms:

- Include 3-10 keywords that describe your work well at end of abstract after 'Index terms – '
- Empty line between Index terms and supervisors

### Supervisors:

- List first and last name of all supervisors involved in the project after 'Supervisors: '
- Empty line between supervisors and Trita-number

**TRITA number:**

- TRITA number after 'TRITA-number:', in the following format: [TRITA-EECS-EX-2020:125](#)  
**Note, leave the space after TRITA-number empty in the PRELIMINARY REPORT VERSION. You will get the TRITA number only after the preliminary version is handed in.**

**Figure captions:**

- Figure caption left-aligned and with smaller text size than main text (see IEEE template)
- Figure caption text starts with Fig. X. (not 'Figure X:'): ['Fig. 1. Velocity versus IMF By for auroral arcs'](#)

**Table caption:**

- Table must be centered and appear ABOVE the table (see IEEE), Table caption (the text) appears as extra line under 'TABLE I' with capital letters.

**Main text:**

- No empty space (more than 1 cm not ok) between Figure and bottom of page!
- No empty space (more than 1 cm not ok) between paragraphs and/or figures!

If that happens, move the figures to another column or even another page. A Figure does not necessarily have to appear close to the text part where it is mentioned.

**General Layout:**

- No pagebreak before reference list

**Appendix:**

- In case you have one or several appendices, put all appendices in one separate pdf-file. Upload the appendix-pdf together with your report-pdf to Canvas. The appendix will be checked by the supervisor (he/she saves it on his/her local computer), but will not be included in the bachelor report book.
- **List Appendix numbers and titles at the end of your main text before acknowledgements and reference list.**

It must have the following order:

[Conclusions ....](#)  
[Appendix 1 – Table of oxygen versus time](#)  
[Appendix 2 – Estimation of oxygen](#)  
[Acknowlegements ....](#)  
[References ....](#)

**References (use BibTeX to create the list automatically!):**

- Numbered (in brackets) references in order of citation
- Check that all internet-links are valid
- All references must have a date

**If publishing date exists – remove access date, if no publishing date exists, use access date in the format (2026, Apr.).**

**Date of Webpage:**

- Obligatory date format for Web pages (year, **3 letter abbreviation of month**) e.g, [\(2021, Jun.\)](#)
- **Do not use the format 'access date 01-12-2019'**
- The date must appear between author and the title of a Web-page

**Example:** O. Patashnik. (2010, Nov.) BIBTEXing. btxdoc.pdf. [Online]. Available: <http://www.ctan.org/pkg/bibtex>

- A reference cannot be longer than the width of the column (this happens sometimes in Latex and needs to be fixed by hand)

- If the author name is missing, leave the author name blank (or use Company name as author)  
E.g.: (2012, jan). Den optiska telegrafan. Tekniska museet. Stockholm, Sverige. [online]. Tillgänglig: <http://www.tekniskamuseet.se/1/942.html>
- Check that a book reference contains **the town where it was printed** (and country if not U.S.) and the **publisher**.
- Check that a university report contains **the town and Country** (e.g. Stockholm, Sweden), **the university name** (e.g. KTH) and the **report type** (e.g. bachelor thesis report: '[BSc thesis](#)', or master thesis report '[Master's thesis](#) or if the report type is unclear '[internal report](#)').  
E.g.: N. C. Loh, "High-resolution micromachined interferometric accelerometer," Master's thesis, Massachusetts Institute of Technology, Cambridge, 1992.

*Look at reference examples in Canvas /files/rapportmallar/Example file IEE transations (Both, the Latex and the word format template contain many examples of different types of references) to find more useful examples!*

**Main types of references: Web-reference, book-reference, scientific journal reference, Phd Thesis, BSc thesis**

**Example Scientific article:** S. Chen, B. Mulgrew, and P. M. Grant, "A clustering technique for digital communications channel equalization using radial basis function networks," *IEEE Trans. Neural Networks*, vol. 4, pp. 570–578, Jul. 1993.

**Example PhD dissertation (same format for Master's thesis or Internal report):** F. Ghasemifard, "Periodic structures with higher symmetries: Analysis and applications," Ph.D. dissertation, KTH, Stockholm, Sweden, 2018.

**Example Bachelor thesis:** F. Ghasemifard, "Periodic structures with higher symmetries: Analysis and applications," BSc. thesis, KTH, Stockholm, Sweden, 2018.

**Example 'föreläsningshandouts' at KTH:**

A. Kaijser, "Telekommunikationens historia", lecture handouts in course *Global Impact of Electrical Engineering*, KTH, Stockholm, Sweden, 2020.

**Example WEB reference:** H. Oberdiek. (2006, Aug.) The ifpdf.sty package. [Online]. Available: <http://www.ctan.org/texarchive/macros/latex/contrib/oberdiek/>

**Example internet page without author: method 1: use company name**

Audi Sverige. (2017, Nov) A8 – världens första att ta över körningen själv. Audi Sverige, Södertälje, Sweden. [Online]. Available: <https://www.audi.se/se/web/sv/senaste/teknik-20171107-aitraffic-jam-pilot-a8.html>

**Example internet page without author: method 2: leave blank**

(2020, Mar) Fortkörning. [Online]. Available: [https://ec.europa.eu/transport/road-safety/topics/behaviour/speeding\\_sv](https://ec.europa.eu/transport/road-safety/topics/behaviour/speeding_sv)

**(Obs! Om ni skriver på svenska, skriv månaden på svenska och 'Tillgänglig' istället för 'Online')**

(2015, Sep) 1G. Wikipedia. [Online]. Tillgänglig: <https://en.wikipedia.org/wiki/1G>

**Example Book reference:** G. O. Young, "Synthetic structure of industrial plastics (Book style with paper title and editor)," in *The importance of plastics*, 2nd ed. vol. 3, J. Peters, Ed. New York: McGraw-Hill, 1964, pp. 15–64.
